ACCURACY. PRECISION. QUALITY.

JPS Manufacturing is an established source for engineering, development, and manufacturing of machined components and assemblies. With experience in many industries and the support of our in-house production, we provide expertise in all processes including research and development, design, CAD, programming, precision welding and prototype creation.

From idea to production, JPS Manufacturing is dedicated to serving and supporting you. At our facility in Scottsdale, we take great pride in our work and apply a meticulous approach towards quality.

We are ISO certified (ISO9001:2000/AS9100 REV.B) and maintain the highest tolerances in our manufacturing and processes (Certificate Number 1006-65-A).

Industries Served

At JPS, our experience spans into many industries including aerospace, semi-conductor, medical, commercial, military and automotive. This has provided us vast knowledge in how to approach solutions for each unique customer.

Here's a few of the areas we're actively servicing:

- Aerospace
- Fuel-Control Systems
- Hydraulic and Pneumatic Components
- Electromechanical Applications
- Medical Equipment
- Firearm Manufacturing

We engineer and perform each project with attention towards application, materials, tolerances and fulfillment. When you need a source for development and manufacturing in your industry, contact JPS.

Equipment & Capabilities

Our staff and facility provide us the ability to perform at the highest level. We have assembled a group of skilled professionals with a focus on detail, quality and efficiency. This puts the best team to work on your project each and every day.

The JPS Manufacturing facility is fully equipped with modern equipment, and also features a productive environment and work space. In the development and production process, we have state-of-the-art CNC machinery including multiple vertical and horizontal mills, lathes and other automated equipment.

In addition, we utilize the latest engineering software for design and development. This also allows us to handle all types of customer-supplied CAD files.

Meeting our own requirements and exceeding those of our customers, our quality assurance lab uses specialized gauges, optical comparators and a CMM (Coordinate Measuring Machine) to thoroughly inspect each project with high precision and accuracy. So, whether you have an existing design or need one, JPS is equipped to fulfill your needs with exceptional results.

Begin the creation of your ideas by contacting JPS Manufacturing today.
